

Dear Parents / Caregivers

This term the students in years 4-6 will be taught drug education as part of the Curriculum in Health.

WHO (The World Health Organisation) defines a drug as anything besides food or water that goes into your body and has an effect. Some topics we will be covering in these discussions are cigarette smoking, alcohol, medication and caffeine. There will be a very clear message taught about what is an illegal or legal substance.

Your child may naturally come home with questions as they begin to learn more about what is a drug and /or how it is used.

If you would like to have a discussion about what is in the program this term, please feel free to make an appointment and I will be able to discuss it in more detail with you.

Yours Sincerely

Classroom teachers

Adam O'Connor
