

Autism Awareness Day Friday the 28th of April.

Autism is a neurodevelopmental condition that affects, among other things, the way an individual relates to his or her environment and their interaction with other people. Every 11 minutes a child is born who will be diagnosed with Autism.

To raise awareness for this common condition amongst children, Golden Bay Primary School will be having an Autism Awareness Day in Term Two on Friday the 28th of April.

For a gold coin donation, students and staff may wear a blue accessory or colour their hair blue to support the work that improves the health and wellbeing of children with Autism. With this donation the Telethon Kids Institute can continue investigating the genetic and neurobiological causes of Autism and can keep working to support families across Western Australia.

We look forward to this being a fun, educational day that raises funds and awareness for children living with Autism.

Yours Sincerely

Michelle Nash
