**First Lego League is an exciting global robotics and innovation program that ignites an enthusiasm for discovery, science, teamwork and technology in kids ages 9 to 14. Students will have the opportunity to solve real-world challenges by building and programming Lego-based robots.**

Applications for the 2018 Golden Bay Primary School Lego League Team are now underway. This program will be open to students in years 5 and 6. The Lego League program will commence term one. Over the course of the year students will spend approximately 25 weeks (1-2 hours per week) building and programming a robot, researching a predetermined topic, and preparing a presentation for the local First Lego League competition; taking place in term four. Team size will be limited to ten members. The program will be coached by teaching staff and will align with the Western Australian Curriculum.

To apply for the Golden Bay Primary School Lego League Team, please complete the whole application and return it to the front office by Friday 23 February.

**Please be advised that there are only ten places offered in the Golden Bay Primary School Lego League and that submission of an application form is the initial step in gaining a placement. Successful applicants will be notified.**
